Skills

- Java | Spring | Spring Boot | JavaScript | TypeScript | MySQL | Node | Angular | Redis | NoSQL | Git | MongoDB.
- AWS | CI/CD | Mockito | Junit | Lambda | OOP | Reactive Programming | Data Structures | Algorithms.
- Microservices | Frontend | Backend | Full-Stack

Experience

Software Engineer **Edvak Health** *Hyderabad* **05/2024 - Current**

- Implemented key enterprise application features using **Angular**, **TypeScript**, **MongoDB**, and **NodeJS**, contributing to the overall system performance and scalability.
- Gained hands-on experience with **Docker** and **microservices** architecture, ensuring smooth deployment and efficient system management.
- Developed a critical **user signup module** for an EHR (Electronic Health Records) system, improving user engagement and data handling.
- Engaged in continuous learning of new technologies to improve project delivery and contribute to team knowledge.
- Leveraged excellent communication and collaboration skills to work closely with cross-functional teams and stakeholders, ensuring smooth workflow and effective project execution.

Associate Software Engineer **PowerSchool** *Bengaluru* **07/2023 - 01/2024**

- Designed and implemented enterprise applications using **Java, Spring Boot, REST APIs, Microservices,** and **MySQL**, ensuring high system availability and performance.
- Developed and optimized key modules in a Java EE-based system, using Spring Framework to enhance scalability.
- Led a team in a company-wide hackathon, developing an innovative solution that integrated AI features for enhanced automation and user experience.
- Volunteered to take on additional responsibilities by fixing pre-existing bugs in alignment with Spring Boot projects, demonstrating a proactive work ethic and commitment to improving overall system quality.

Software Engineer Intern **PowerSchool** *Bengaluru* **09/2022 - 06/2023**

- Collaborated with senior developers on full-stack projects, gaining exposure to **Java, MySQL, JavaScript,** and **HTML/CSS**.
- Completed a 10-month self-directed immersive learning in Java full-stack technologies.
- Contributed significantly to a dashboard component feature development for an internal project.

Education

M.Tech Integrated **Vellore Institute of Technology** *Vellore* **06/2018 - 05/2023**

- Major in software engineering.
- **CGPA**: 8.1/10.00

High School **Vani Vidyalaya** *Vellore* **07/2017 - 04/2018**

- **CGPA**: 8.4/10.00

Projects

Find a Job

Spring Boot | Microservices | MongoDB | Service Registry

- Developed a job hunting platform using a microservices architecture with services dedicated to job listings, company reviews, and user management.
- Utilized Spring Boot and MongoDB to build a robust backend architecture, incorporating a service registry to manage communication between microservices.

Absence Management System

Spring Framework | Java EE | Spring Boot | Angular

- Streamlined the process of managing teacher absences and assigning substitutes by developing a backend system with Spring Framework and Java EE.
- Utilized Angular for frontend development, ensuring seamless communication between the frontend and backend components.

Breeze Watch

Angular | Tailwind | TypeScript

- Built a weather application to retrieve real-time weather information and forecasts for specific cities using **Angular** and **Tailwind**.
- Implemented a **city-based search** feature to enable users to get specific weather data for various locations.
