SUBASH K

Turning ideas into reality through the art of programming

subashk1153@gmail.com | LinkedIn | GitHub | Portfolio | +91 8220706790

EDUCATION

Master of Technology in Software Engineering (Integrated) July 2018 – May 2023
Vellore Institute of Technology (VIT VELLORE) **CGPA**: 8.1/10.00

High School July 2017 – April 2018
Vani Vidhyalaya **CGPA**: 8.4/10.00

SKILLS

- **Programming Languages:** Java, JavaScript, J2EE, TypeScript, SQL, MongoDB.
- **Frameworks:** Spring boot, Spring.
- **Web Technologies:** HTML, CSS, Servlets, JSP, Angular, Tailwind.
- **Core CS Fundamentals:** Data Structures and Algorithms, OOP, Database, MySQL, Computer Networks, Operating Systems.
- **Tools:** Maven, Jira, Git, Postman, Docker.

WORK EXPERIENCE

Software Engineer
Edvak Health | Hyderabad
May 2024 – Present

- **Exposure: Angular, TypeScript, Mongodb. NestJs, Kubernetes.**
- Helped in building key features by developing good quality of code. .
- Gained extensive hands-on experience with Kubernetes and microservices architecture.
- Engaged in continuous learning and adaptation of new technologies to improve project outcomes.

Associate Software Engineer
PowerSchool | Bangalore
July 2023 – January 2024

- **Exposure: Java, Springboot, REST APIs, Microservices, MySQL, Hibernate, Git, Angular, AWS.**
- Developed and implemented key modules for a JavaEE project using the Spring Framework for enhanced scalability.
- Engaged in teamwork with other developers to identify and address bugs and errors present in the software, and resolved it.
- Contributed to a Hackathon by utilizing OpenAI to automate question creation based on input course material**.**

Software Engineer Intern
PowerSchool | Bangalore
September 2022 – June 2023

- **Exposure: Java, MySql, Javascript, HTML, CSS, OOPS.**
- Completed a 10-month self-directed immersive learning in Java full-stack technologies.
- Collaborated with the team to develop features across both the frontend and backend.
- Made a substantial contribution to the project by implementing dashboard components.

PROJECTS

Find a Job
- Using Spring boot, Microservices, MongoDB, Service Registry
- Developed a job hunting platform using Spring Boot and MongoDB with a microservices architecture, including dedicated services for job listings, companies, reviews, and user management.

Absence Management System
- Using Spring Framework and JAVA
- Developed a project aimed at streamlining the process of creating teacher absences and identifying suitable substitutes, utilizing Spring framework for the backend and Java EE, along with JSP servlets, for the front end.

Employee Management System
- Using ReactJS, NodeJS, Express
- This project is done while learning full-stack development. Here we can create employees and companies.
- Employees can be added to a company and moving from one company and another can also be done along with the CRUD operations for the Company and employee.
